Service Plus: Everything We Know It Does

Feature view, drawn only from the NIC deck (22 slides) and the API documents. Dashed amber boxes are not disclosed or are future plans.

Stated by NIC · Not disclosed / planned

M1 to M25 are the module numbers used in the architecture documents.

1 Platform at a glance

3,564 services
- Configured on the platform

345 million applications
- Received to date

33.6 billion revenue
- Collected (currency not stated)

5.8 billion DBT
- Direct benefit transfer disbursed

36 States/UTs
- Plus 18 central departments, under different brand names

Metadata-based framework
- Low-code / no-code design, configure, run

2 What it serves

Service categories
- Government to Citizen (G2C)
- Government to Business (G2B)
- Government to Employee (G2E)
- Government to Government (G2G)

Service types
- Statutory
- Regulatory
- Developmental
- Consumer utility

Why ServicePlus (NIC claims)
- Rapid rollout, services available around the clock
- One configurable platform for the whole service lifecycle
- Multi-tenant architecture
- SSL/TLS encryption and OAuth 2.0

M19

Focus areas
- In-built tools to design, configure and run services
- Agility: any government entity can roll out at any level
- Unified framework for service delivery and grievance redressal

3 Branded deployments and entry points

Named deployments
- Saral Haryana, SevaSindhu Karnataka
- RTPS Bihar, Excise Department Kerala
- eDistrict Tripura and Odisha
- JanSugam Jammu & Kashmir, JharSewa Jharkhand

M4

Separate pages and URLs
- One URL or page for each service
- One for a department
- One for an entire state

M4

4 Service definition lifecycle (slide 19)

1 Service Definer Guide
- Fill in the guide

2 Tenancy extension
- Implement

3 Configure
- Configure the service

4 Test
- Test the service

5 Train
- Train the officials

6 Freeze
- Freeze the service

7 Activate units
- Activate service units

8 Assign users
- Assign users

9 Launch
- Launch the service

M17

5 Design time: tools for service owners (no code)

Form Designer
- Drag and drop, multi-page, multilingual
- Forms for applicants and officials
- Special fields, user-defined JavaScript insertion
- Link fields across forms, predefined formats
- Built-in, server-side and API-based validation
- Help text at form and field level

M5

Process Flow Designer
- Drag and drop workflow
- Conditional logic
- Fork and merge using gateways
- Timer tasks and webservice tasks
- Real-time workflow monitoring
- Customizable workflows

M7

Document Designer
- Integrated editor with form values and system variables
- Acknowledgement, delivery, rejection, intermediate certificates
- HTML, XML, spreadsheet, PDF
- Data-based conditions, QR code, DSC stamp, watermark
- Unique URL per certificate

M10

Notification Designer
- SMS, email, Sandes, WhatsApp
- Trigger points: accept, reject, process
- User-defined content and triggers
- Smart selection of phone and email contacts
- OTP verification of mobile and email
- Dedicated bulk notification module

M12

Organisation structure
- Full structure and hierarchy of any department
- Designations that exist in the organisation
- Inter-departmental mapping by jurisdiction
- Electoral constituency data and mapping

M2

Service wizard and versions
- Wizard-style configuration of services
- Launch new services in minutes
- Grievance redressal policy for each service
- Service versioning: major and minor

M17

6 Run time: applicants, officials and operators

Applicant
- Apply by self or through assisted mode
- Track application status online
- Status alerts for submitted applications
- Lodge grievances for service failures

M8

Assisted mode
- Operator applies on behalf of a citizen
- Franchise logins (K1, B1, G1, AJSK, BSK)

M13

Workflow player (officer)
- Role-Based Access Control (RBAC)
- Task queues, remarks and history
- Monitoring and management dashboard
- Automated notification system

M9

Grievance redressal
- Policy in line with service delivery acts
- Automatic escalation and routing by rules
- Up to three appellate levels
- Tracking, notifications, pain-point dashboard

M15

Listed in the journey slide (slide 5)
- Action forms, derived services, business rules
- Bulk module and FIFO (named, not explained)
- Audio captcha, configurable login, configurable reference number
- Secured APIs

M21

7 Reports: SPReport

Reports and dashboards
- Service-specific analytical and monitoring reports
- Customizable templates and filters
- Interactive dashboards and visualisations

M16

Data and access
- Integrates external data sources
- Role-based access control
- Export in various formats
- Unique URL for a report

M16

8 Integrations with external systems

Identity, KYC and signing
- Aadhaar, eKYC
- DigiLocker, JanParichay
- eSign (digital signature)
- eTaal

M14

Payment gateways
- BharatKosh, SBI ePay, PayU, BillDesk
- ICICI EazyPay, CSC eWallet, eTreasury
- Others "and more"

M11

Money transfer
- DBT payments through PFMS

M14

Messaging
- Sandes, WhatsApp, SMS, email
- Bhashini (language) in the journey slide

M12

RESTful API
- Configurable interface to any REST API

M14

Data sharing
- Configurable API, synchronous and asynchronous

M14

9 Mobile enablement

Mobile app
- Customizable ServicePlus mobile app
- Services launched dynamically on mobile
- Real-time access on the go

M8

Web and other apps
- Responsive forms on all devices
- Services on other apps via secure API

M8

10 Security as claimed

Stated by NIC
- SSL/TLS encryption and OAuth 2.0 authentication
- Secured APIs. Audit results and controls are not described.

M3

11 NIC roadmap (slide 21): planned, not confirmed

Sept 2024
- Bhashini; data discovery with Elasticsearch and RabbitMQ

Nov 2024
- Upgraded SPReport with live data

April 2025
- Microservices architecture

July 2025
- Docker containers instead of virtual machines

May 2026
- Web apps generated through ServicePlus

12 Not disclosed by NIC

Database and storage
- Product, schema and document storage

Hosting and deployment
- Servers, tenants, availability, recovery

Source and internals
- Code, component boundaries, versions

Data export
- Whether services and applications can be exported

Multi-tenant separation
- How tenants are separated

Security audit
- Controls and results
